VELDO — FOUNDER EXECUTION SPRINT

Bottom of the Bottom to the Peak of the Peak

An all-out moonshot to take Veldo from zero to **$1,000,000 ARR** in **one month** on a budget of **100 focused hours**. Sequenced through the four pillars — first you sell, then you amplify, then you fund, then you automate the whole machine.

THE TARGET	$1,000,000 ARR	=	$80,000 MRR	in 30 days

Reality check, stated up front: $80K MRR in 30 days from a standing start is a moonshot, not a forecast. It is reachable on exactly one path — **high-ticket deals priced against the salary they replace ($5–8K/mo)** — and only if every hour below converts. The next page shows the unforgiving math.

100	100	4	~25
STEPS	HOURS	PILLARS	HRS / WEEK

THE ROADMAP

01	SALES	The wedge — win paying customers & a repeatable motion	Steps 1–30	30 h
02	MARKETING	Amplify — turn proof into reach and a content engine	Steps 31–55	25 h
03	FUNDRAISING	Fuel — convert traction into capital	Steps 56–80	25 h
04	AUTOMATION	Leverage — automate the company; price to the payroll	Steps 81–100	20 h

How to use this: work top to bottom. Each step has an hour budget; the four pillars sum to exactly 100 hours. Don't jump ahead — selling first is what earns the proof that makes marketing land, fundraising credible, and automation worth paying a premium for.

THE MOONSHOT MATH

What $80K MRR actually demands

Revenue is gated by buying decisions, not effort. At self-serve prices the target needs hundreds of customers — impossible in 30 days. High-ticket is the **only** door:

PRICE / MO	CUSTOMERS FOR $80K MRR	VERDICT IN 30 DAYS
$200	400 customers	**× Impossible**
$500	160 customers	**× No**
$1,000	80 customers	**× Very unlikely**
$2,000	40 customers	**× Brutal**
$5,000	16 customers	**» Hard — the floor**
$8,000	10 customers	**» The moonshot path**

THE FUNNEL TO LAND ~13 DEALS @ ~$6.25K AVG = $81K MRR

~3,000	**~150**	**~55**	**~13**	**$81K**
quality outreaches	qualified calls	real opportunities	closed @ $6.25K/mo	MRR = $975K ARR

The honest tension: ~3,000 outreaches and 150 calls by hand in 100 hours is impossible solo — which is why the moonshot version *front-loads* the automate-able sales steps (enrichment, personalisation, reply triage) from Day 1, even though Automation is formally Pillar 4. Automation isn't just the prize at the end here — it's the only way the funnel math closes at all.

THE 4-WEEK MRR LADDER

WEEK	FOCUS	DEALS (cum.)	MRR (cum.)
Week 1	Sales — first high-ticket closes	**3**	**$19K**
Week 2	Marketing — pipeline explodes	**7**	**$44K**
Week 3	Fundraising — fuel + credibility	**11**	**$69K**
Week 4	Automation — close the last batch	**13**	**$81K »**

01 SALES

The wedge — win paying customers & a repeatable motion

Steps 1–30 · 30 steps · 30 hours

#	STEP	HRS
1	**Write the one-line promise.** Nail what Veldo does for a founder in one sentence. Everything downstream inherits this.	1
2	**Pick ONE beachhead ICP.** Choose a single narrow customer (e.g. pre-seed B2B SaaS founders). Resist the urge to serve everyone.	1
3	**List the top 3 pains.** For that ICP, write the 3 most expensive, urgent pains Veldo removes.	0.5
4	**Define the wedge.** Decide which single feature gets the first 'yes'. Sales is the wedge into the rest.	1
5	**Build a 90-second demo flow.** Script the shortest path that shows real value live, no fluff.	1
6	**Stand up a bare landing page.** Headline, sub, 3 bullets, one CTA. Ship ugly, ship today.	1.5
7	**Add a 'book a call' link.** Calendly/Cal.com embed. Remove every click between interest and a meeting.	0.5
8	**Draft the cold outreach v1.** 3-line message: trigger, pain, ask. Personalisable in 20 seconds.	1
9	**Build a 50-lead list.** Hand-pick 50 ideal accounts. Quality over volume for the first batch.	1
10	**Enrich the list.** Find decision-maker + email + one personal trigger per lead.	1.5
11	**Send the first 25 outreaches.** Manually. Feel the responses. Do not automate yet.	1
12	**Log every reply verbatim.** Objections are gold. Capture exact wording in a sheet.	0.5
13	**Book 5 discovery calls.** Goal of week 1. Even 3 is a real signal.	1
14	**Run discovery, not pitch.** Ask about their process today. Listen 80%, talk 20%.	1.5
15	**Map the buying process.** Who decides, what budget, what timeline, what blocks them.	1
16	**Write the objection bank.** Top 8 objections + a tight one-paragraph answer each.	1
17	**Tighten the demo.** Cut anything that didn't make eyes light up on calls.	1
18	**Make a pilot offer.** Time-boxed, low-friction first engagement with a clear success metric.	1

#	STEP	HRS
19	**Close the first paying user.** Charge something, even if small. A paid 'yes' beats 10 free 'maybe's.	1.5
20	**Onboard them personally.** White-glove. Their success is your case study.	1
21	**Capture a quantified win.** Get a number: hours saved, replies booked, dollars influenced.	1
22	**Ask for a testimonial.** While the win is fresh. One sentence + name + logo.	0.5
23	**Ask for 2 referrals.** Best leads come warm. Make the ask explicit and easy.	0.5
24	**Set your real price.** Anchor to value/ROI, not cost. Test a higher number than feels comfortable.	1
25	**Build a one-page sales deck.** Problem, promise, proof, price. Sendable after any call.	1.5
26	**Create a follow-up sequence.** 3 touches over 7 days for warm-but-not-closed leads.	1
27	**Define your sales metrics.** Track: outreach, reply rate, calls, close rate, ACV.	0.5
28	**Send the next 25 outreaches.** Apply everything learned. Watch reply rate climb.	1
29	**Close 2 more customers.** Now you have a repeatable motion, not a fluke.	1.5
30	**Write the sales playbook v1.** Document the motion so it can be repeated (and later automated).	1

Revenue checkpoint → ~3 high-ticket customers closed · ~$19K MRR · objection bank + playbook v1.

02 MARKETING

Amplify — turn proof into reach and a content engine

Steps 31–55 · 25 steps · 25 hours

#	STEP	HRS
31	**Define your category narrative.** The story of the world you're building. Bigger than a feature list.	1
32	**Pick 1 primary channel.** Where your ICP actually hangs out. One channel done well > five half-done.	1
33	**Claim your handles.** Same name everywhere. Consistent bio, link, and avatar.	0.5
34	**Write a content pillar set.** 3 themes you'll own. Every post ladders up to one of them.	1
35	**Turn sales calls into content.** Each real objection/win is a post. You already did the research.	1
36	**Publish your founding story.** Why Veldo exists. People buy the why before the what.	1
37	**Ship 5 posts in week-3 voice.** Build the habit. Done beats perfect.	1
38	**Create a lead magnet.** A template/checklist your ICP would pay for, given free for an email.	1
39	**Add email capture to the site.** Connect the magnet to a simple list tool.	1
40	**Write a 3-email welcome flow.** Deliver value, tell the story, make a soft offer.	1
41	**Build a simple referral hook.** Give users a reason and a way to share Veldo.	1
42	**Reach out to 5 micro-influencers.** Niche voices your ICP trusts. Offer value, not just an ask.	1
43	**Guest on 1 podcast/newsletter.** Borrow an existing audience instead of building from zero.	1
44	**Publish 1 deep 'proof' piece.** A case study with your real customer number from the sales phase.	1.5
45	**Repurpose it 5 ways.** Long post -> thread -> short video -> email -> carousel.	1
46	**Set up basic analytics.** Know which channel/post drives signups. Kill what doesn't work.	1
47	**Run a tiny paid test.** $50-100 to learn messaging, not to scale. Watch CTR + signup cost.	1
48	**Start an SEO seed.** One keyword page targeting a real buying-intent search.	1.5
49	**Build a 'wall of love'.** Collect screenshots of praise. Social proof compounds.	0.5

#	STEP	HRS
50	**Engage 30 min daily in-channel.** Reply, help, be present. Distribution is a relationship.	1
51	**Launch on one platform.** Product Hunt / a relevant community. Prep assets a day ahead.	1.5
52	**Convert attention to calls.** Every campaign ends in your book-a-call or signup CTA.	0.5
53	**Measure CAC vs ACV.** Make sure a customer costs less than they pay. Margin matters now.	1
54	**Double down on the winner.** Whichever channel/post outperformed, pour the next week into it.	1
55	**Write the marketing playbook v1.** Document the repeatable distribution motion.	1

Revenue checkpoint → pipeline full, 7 cumulative closes · ~$44K MRR · CAC < ACV proven.

03

FUNDRAISING

Fuel — convert traction into capital

Steps 56–80 · 25 steps · 25 hours

#	STEP	HRS
56	**Decide if you should raise.** Only raise to pour fuel on a working motion. You now have proof.	0.5
57	**Set the round shape.** Amount, instrument (SAFE), target valuation, runway it buys.	1
58	**Build the traction slide.** Customers, revenue, growth rate, retention. Your strongest asset.	1
59	**Draft the 10-slide deck.** Problem, solution, market, traction, model, team, ask. Tight.	2
60	**Write the one-line blurb.** The forwardable sentence that gets you the meeting.	0.5
61	**Build a simple data room.** Deck, metrics, cap table, incorporation docs in one folder.	1
62	**Nail the metrics narrative.** Know your numbers cold: CAC, LTV, NRR, burn, growth.	1
63	**Define use of funds.** Exactly how the money buys growth. Tie it to the four pillars.	1
64	**Build the investor list.** 50 investors who fund your stage + sector. Warm-path each.	1
65	**Rank by fit + warmth.** Tier A/B/C. Practice on C-tier before A-tier.	1
66	**Map intro paths.** For each target, find the warmest mutual connection.	1
67	**Draft the intro-request template.** Make it forwardable: blurb + ask + why-them in 4 lines.	0.5
68	**Write the cold investor email.** For the no-warm-path ones. Lead with traction.	1
69	**Practice the pitch out loud.** 5 times. Record yourself. Cut the rambling.	1
70	**Run 3 practice pitches.** With C-tier or friendly founders. Collect every question.	1
71	**Refine deck from questions.** Pre-empt the top objections inside the deck.	1
72	**Open the round formally.** Send the first batch of intro requests + cold emails.	1
73	**Book 10 investor meetings.** Density matters. Cluster them to create momentum.	1
74	**Run meetings, drive to next step.** Always end with a clear next action and date.	2
75	**Send tight follow-ups.** Within 24h: thank, recap, attach, propose next step.	1
76	**Create competitive tension.** Parallel-process. A timeline turns 'maybe' into 'yes'.	1
77	**Get the first commitment.** One lead/anchor unlocks the herd. Push for it.	1

#	STEP	HRS
78	**Handle terms simply.** Standard SAFE. Don't over-negotiate a small round.	1
79	**Close and collect.** Signatures + wire. Money in the bank, not 'verbal'.	1
80	**Send an investor update.** Start the habit now. Updated backers fund the next round.	0.5

Revenue checkpoint → 11 cumulative closes · ~$69K MRR · anchor commitment wired to fund the final push.

04 AUTOMATION

Leverage — automate the company; price to the payroll

Steps 81–100 · 20 steps · 20 hours

#	STEP	HRS
81	**List every repetitive task.** Across sales, marketing, ops, product, data, finance. Time-cost each.	1
82	**Rank by hours x frequency.** Automate the biggest time-sinks first. Follow the payroll, not the tool.	1
83	**Pick the top 5 to automate.** The ones replacing real hours/headcount carry the most value.	0.5
84	**Map each as a workflow.** Trigger -> steps -> output. Draw it before you build it.	1
85	**Automate lead enrichment.** Agent/API pipeline that builds + enriches lead lists hands-free.	1
86	**Automate outreach personalisation.** AI drafts the personalised first line at scale, you approve.	1
87	**Automate reply triage.** Classifier routes replies: interested / later / no. Saves daily hours.	1
88	**Automate content repurposing.** One asset -> many formats via an AI step. Marketing on autopilot.	1.5
89	**Automate the investor-update draft.** Pull metrics -> AI drafts the monthly update for review.	1
90	**Automate internal reporting.** Daily/weekly KPI digest assembled and delivered automatically.	1
91	**Connect your data sources.** One source of truth the agents read from. Kill copy-paste.	1.5
92	**Add a human-approval gate.** Automation drafts; a human ships anything customer-facing. Trust + speed.	1
93	**Automate onboarding steps.** New customer triggers the white-glove sequence automatically.	1
94	**Build an internal ops agent.** Handles a recurring back-office job (scheduling, follow-ups, data hygiene).	1.5
95	**Instrument everything.** Log time saved per automation. Prove the ROI you'll charge for.	1
96	**Set guardrails + monitoring.** Alerts when an automation fails or drifts. Safe to scale.	1
97	**Package automation as the premium tier.** Price to the labour it replaces (a salary), not a SaaS seat.	1

#	STEP	HRS
98	**Document the automation library.** Reusable building blocks so each new automation is faster.	1
99	**Review the full loop.** Sales -> Marketing -> Fundraising -> Automation now reinforce each other.	0.5
100	**Plan month 2.** Pick the next ICP/channel/automation. Compound from the peak.	0.5

Revenue checkpoint → 13 cumulative closes · ~$81K MRR = ~$1M ARR — TARGET HIT · premium tier priced to the payroll it replaces.

THE COMPOUNDING LOOP

Why this order is the whole game

Sales first — creates proof and revenue — the only thing that makes everything after it credible.

Marketing second — takes that proof and turns one customer into a repeatable flow of attention.

Fundraising third — converts visible traction into capital on the best possible terms.

Automation last — uses the capital to replace hours and headcount — the pillar you charge the most for, because it's priced against a salary, not a subscription.

---

13 deals × ~$6.25K/mo	=	$81K MRR	=	$1M ARR

This is a moonshot — most months won't land all 13. But aim at $80K MRR and miss to $30K, and you've still built, in 100 hours, a company most founders don't reach in a year. Light the engine.
